

## ROUND METAL CEILING LOUDSPEAKERS

### RCS5/T

The RCS range of ceiling loudspeakers have been carefully designed to blend seamlessly in to any installation. These units are stylish yet unobtrusive. Made from a pressed steel epoxy coated chassis incorporating a twin cone driver, which offers a wider frequency response than a standard single cone, this gives the RCS range a superior performance. Designed to make installation quick and easy and suitable for use in applications where background music and speech are the primary requirement such as shops, schools, restaurants, hotels, public houses, offices etc.

(unit: mm)

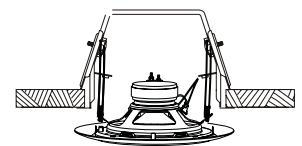

**1)** Cut the required hole for the speaker.

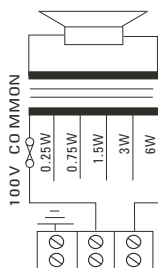

**2)** Loosen the retaining sliders and push to the top of the bracket. Once the bracket is through the hole pull down the sliders and tighten the retaining nut clamping the ceiling.

**3) FITTING THE SPEAKER**  
Compress "V" spring and fit into the retaining ear within the bracket. Connect cable to terminal block and select wattage required.

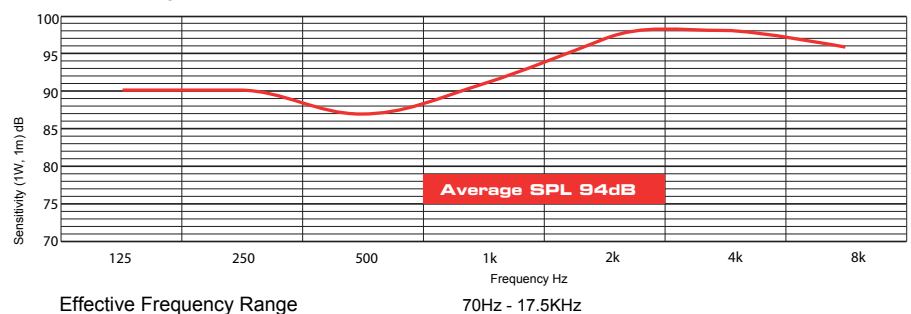

**4)** Fit second "V" clip into second retaining ears and gently push the speaker up into the bracket (do not push the central perforated grille area) the speaker will self locate into the bracket.
